

API Keys Setup Quick Reference

Check Your Shell

```
bash  
  
echo $SHELL
```

Add API Keys to Profile

```
bash  
  
# For Bash users  
vim ~/.bashrc  
  
# For Zsh users  
vim ~/.zshrc
```

Common API Key Exports

```
bash  
  
export SHODAN_API_KEY="your_shodan_api_key_here"  
export CENSYS_API_ID="your_censys_id_here"  
export CENSYS_API_SECRET="your_censys_secret_here"  
export VIRUSTOTAL_API_KEY="your_virustotal_key_here"  
export AMASS_CONFIG=~/.config/amass/config.ini"
```

Reload Shell

```
bash  
  
source ~/.bashrc # or  
source ~/.zshrc
```

Verify Keys Work

```
bash
```

```
echo $SHODAN_API_KEY
```

Security Tips

- Never put API keys in scripts
- Change keys if compromised
- Use environment variables only
